PROFESSIONAL SUMMARY

I am a dedicated web developer with some freelance experience. I have completed the Front-End Engineer course from Codecademy and the Front-End Web Development program from CodeOp. I am proficient in React, JavaScript, HTML, CSS, Tailwind, and SCSS, with a solid understanding of design principles and some experience with Figma. As a quick learner and a hardworking, team-oriented professional, I am eager to contribute to dynamic development teams.

WORK EXPERIENCE

Freelance

Front-end development

I have some experience working as a freelance front-end developer. During this time, I worked on a variety of projects, including building responsive websites. My work involved using HTML, CSS, JavaScript, and popular libraries like React to deliver high-quality web solutions for clients. This freelance experience helped me improve my skills in both technical development and effective communication with clients to meet their needs.
